THE REDCLIFF REVIEW

THURSDAY, APRIL 19, 1934

Number 25

Fourth Session Of Legislature Closed Monday

Some Important Legislation
Passed During The Session

After sitting for almost 10 weeks, the fourth session of the seventh Legislature of the province of Alberta prorogued late Monday afternoon.

His Honor Lieut.-Governor W. L. Walsh performed the prorogation ceremonies, entering and leaving the legislative chamber accompanied by Col. A. C. Gillespie, V.D., A.D.C.

The session, which opened on Thursday, February 8, was one of the longest and most far-reaching of recent years.

In a legislative day, 82 bills were registered, of which 76 passed. Three bills registered were withdrawn and three were on the order paper.

Of the total number passed, five were private bills.

In the 1933 session there were 69 bills passed.

Important legislation passed included the law trade and industries bill, setting up a modified system of codes and establishing a new government department.

Then there were amendments to the Liquor Act for the first time in many years. Debt adjustment legislation was extended, the School Act was amended and many other features were dealt with.

In a financial way the House voted supply totalling about \$21,000,000, of which about \$1,000,000 was on revenue and about \$7,000,000 on capital.

Many resolutions were dealt with and a wide variety of business was conducted.

A feature of the committee work was the appearance of Major C. H. Douglas, originator and chief experts of the Douglas system.

An inquiry into debt adjustment and agricultural conditions was also held.

Many of the members left for their homes on Monday night, and by Tuesday most will have gone.

TO PREPARE WAYS FOR WHEAT PRICES

It is up to the Canadian and 14 other represented governments to act upon the weighty scheme for raising the world price of wheat produced by the World Wheat Conference, which has been sitting in Rome for more than a week.

The plan, which calls for fixing of a minimum price based on the relation of export supplies to the demand from month to month, was being forwarded to the interested governments who were invited to take action before the wheat committee meets again in London on May the fourth.

The wheat conference hopes the governments can formulate their stand in order the London meeting can prepare the way for the institution of the scheme in June or thereabouts.

"How's business, Mr. Gumley?"

"Not this morning and slackening off this afternoon."

Federal Relief Bill Has Big Majority

U. F. A. Members Support The Government

The government relief bill passed the federal house Tuesday by a vote of 83 to 87. All the U.F.A. members supported the government. The C.C.F. members split. Agnes Macaul and J. S. Woodworth voted with the Liberals.

When passed by the Senate, the bill will give the Dominion authority to pay relief bills that have been accumulating since March 31, when last year's act expired.

Liberal Wins South Oxford By-Election

Liberal Wins Largest Majority Ever in This Riding

In the Dominion by-election held in South Oxford last Monday, A. S. Rennie, the Liberal candidate, won out by a majority of 1530. South Oxford has always been a strong Liberal constituency and in 67 years has elected only one Conservative.

World Wide Strife of Wheat Reduction

Undined By The World Wheat Advisory Committee

A wheat reduction in a world-wide scale calling for average decreases ranging from 10,000,000 to 50,000,000 acres which would absorb the surplus stock in one to three years, according to the plan adopted was outlined by the world wheat advisory commission in one yesterday. The United States delegate, Frederick Murphy, placed three alternative plans before the world conference.

The Softball diamond is now splendid shape, thanks to Mr. Gerner who did the work. Both boys' and girls' teams have already had several "shorts and great interest is being shown.

JUST FOR FUN

An Englishman, living in Canada was complaining of the relative high cost of everything here in comparison with what he could find in England.

"Why," said he, "I can buy a shilling in old England but I must pay a dollar for it."

"Then why the blazes didn't you stay in England," asked an annoyed Canadian.

"My word!" said the Englishman, "because I didn't have a shilling."

"Notice: 'Weak eyes, eh?' 'Well how many lines can you read on that chart?' 'What?' 'What chart?'"

"But, Dorothy, aren't you getting Jack and Bill confused?" "Sure, I get Jack confused one night and Bill the next."

Teacher: "Now Willie, can you define an octopus?" Willie: "Please, Miss, its a cat with eight sides."

Local Legion Observe Vimy Anniversary

Have Successful Smoker In Club Rooms Friday

Local Legion officers and members held a Vimy Smoker in their club rooms last Friday at their club rooms last Friday evening. Although the attendance was not as large as usual, it enjoyed the splendid program put on for the occasion.

The Local Rebekahs Hold Social Evening

The local Rebekah Lodge held a pleasant social evening in the L.O.O.F. Hall last evening after their regular lodge meeting. A. Parkes and several other lodge members from Medicine Hat were visitors for the occasion. The first prize for whist was won by Mrs. L. Moreton and the consolation went to Mrs. P. McDermott. In bridge the first prize went to Mr. W. Brannan and the consolation to Mrs. A. Parkes. After cards daily refreshments were served and the evening was given up to dancing. Mrs. G. Thompson supplied the music and a very enjoyable time was spent.

Scouts Present Mr. Stewart With Gift

The local Boy Scouts held a social evening in their scout quarters on Friday evening to bid good-bye to Rev. Mr. Stewart who has taken such a prominent part in the work of the scouts since their organization over a year ago.

Patrol Leader Elmer Conger, on behalf of the boys, presented Mr. Stewart with a fine cigarette holder. Mr. Stewart thanked the boys and gave them much good advice for the future. The remainder of the evening was given over to jollification in which the Scouts heartily participated.

DEPT. TO OPERATE THE INDUSTRY ACT

Yielding to strong demands from various sections of the house, Premier Brownlee stated in the legislature that a government department instead of a bureau will be organized to administer the trade and industry act.

This far-reaching bill provides for the formulating of "business codes" in this province to check ruthless competition, place the coal industry on a better foundation and giving general encouragement to industry.

His many friends in Redcliff will be sorry to learn that Mr. A. B. Clow, of Medicine Hat is seriously ill. He is now in Calgary undergoing treatment.

A jolly crowd of young folk gathered at the home of Miss Elvior Learmonth on Tuesday evening as a surprise party to help her celebrate her seventeenth birthday. A most enjoyable evening was spent in games and dancing after which delicious refreshments were served.

All Ready For The Entertainment Friday Night

To Be Held Under Auspices of Little Theatre

Everything is now in ready gear for the three one-act plays to be put on in the Little Theatre tomorrow evening. All three casts have been rehearsing faithfully so that a good evening's entertainment is assured.

Paul Knapper's orchestra will be present to supply excellent music between acts. Mayor Cox will also be present to draw the tickets for the 20 prizes which will be given away to the lucky ticket holders. Every purchaser of a ticket has a chance of winning one of these prizes, each of which is worth more than the price of admission. Be sure to be on hand and encourage this community enterprise.

Girl Softballers Have A Successful Social

Was Held In Hotel Rotunda Last Friday

The Girls Softball Club were hostesses at a pleasant bridge drive held in the Redcliff Hotel on Friday evening last. Mrs. Davidson very kindly allowed the club the use of the spacious rotunda for the purpose.

The honors for the evening went to Mrs. Rutherford Smith and Jean Maillard and the congratulations to Mrs. A. E. Oakland and Miss Helen Rose.

After cards dainty refreshments were served. As a result of the venture the girls have raised enough money to pay their entrance fee to the league.

Redcliff Reminiscences

Taken From The Review File of April 23rd, 1915

The Galt Oil Co. is made up entirely of local men. Messrs. Lang, Woodcock and Corey left today for Calgary to represent the company in closing a deal for the transfer of some of its leases.

The Review is in receipt of a letter from pte. Jack Jones of the King's Own Yorkshire Light Infantry, in which he wishes to be remembered to all inquiring friends.

The Dominion Government Staff Commission paid Redcliff a visit on Tuesday.

Mr. E. G. Waller, who has just returned from the east where he has been looking into the motor truck business, and to the Review: "After a visit to one of the eastern Canadian cities one could have no doubt that a great and terrible war is in progress. The cities are full of uniformed soldiers. These are the flower of the country. When one thinks what these fine young men are gathered together for and remember the hardships they must endure, it is then one realizes the terrible nature of the present struggle."

To Form Imperial Section of Legion

Total of 50 Names Already secured for Branch

Further progress to the formation of an Imperial section of the Canadian Legion, B.E.L. of the Medicine Hat branch was in evidence at a well attended meeting of veterans, Tuesday.

The chairman informed the meeting a total of 50 names of Imperial veterans necessary for the formation of the branch was secured, and application for the local charter has been made. A further meeting upon receipt of charter will be called at which time the election of officers will be held.

Brake Testing Machine Installed at Beny's

Car Breaks Will Be Tested Free At This Garage

Beny and Son of Medicine Hat have recently installed in their garage a Raybestos brake testing machine which is the very latest device for giving perfect adjustment. It shows to a pound the amount of pressure each brake carries. The equipment cost in the neighborhood of \$800 but since so much of the safety of human life depends on perfectly working brakes, this firm has agreed to expense in giving their customers the best possible service.

The tester is now in working order and this garage will test all brakes free of charge.

The Review has seen the tester in operation and it certainly exposes all the weaknesses of the brakes on any car. After the car has been put on the tester the operator can tell at a glance which brake is not functioning properly.

Tickets are selling rapidly for the big L. O. O. F. event to be held in the Sunbeam Air Port here on May 24th. Elaborate preparations are being made for the event and a record crowd from all parts of the district is expected. Great interest is being shown in the handsome prizes to be given away.

Churches

ST. MARY'S CHURCH
Celebration of Mass every Sunday at each month except 1st Sunday at 8:30 a.m.

ST. AMBROSE RUMH
April 22nd, 23rd Sunday after Easter; Evensong 3:00 p.m. conducted by Rev. J. F. Butcher, Rural Dean.

Subject: "Absolute Unselfishness."
"Every one who rests his hope on himself justifies himself as he pursues."

The Liquor Act Amendments Are Approved

Legislature Votes to Extend Beer Parlor Hours And Allow Bottles To Be Taken From Premises

In the closing day of the session the legislature put through one of its most important legislation, namely, amendments to the Liquor Act. The amendments, which precipitated the most heated discussion of the entire session and saw the U.F.A. members debating with each other to an extent not seen for many years.

In the net result two highly important amendments were passed. One extends the hours of closing beer parlors on Saturdays until 10 p.m. instead of 9 p.m. as at present, and the other permits bottles to be taken from the premises where purchased, for consumption elsewhere. The liquor commissioner is also empowered to extend hours beyond 8 o'clock on liquor hours.

Upon these two points occupied the House for most of the day with the extension of closing time being the last item of legislation dealt with by the House.

The vote was very close, the motion carrying by only one of a majority.

A meeting to clean up the affairs of the hockey club and rink association will be held in the Armouries on Sunday morning at 11 o'clock. All interested are requested to attend.

The three one-act plays being put on in the Little Theatre, tomorrow evening promises to be a real good entertainment. As this will be the last of the season it is hoped there will be a real bumper house to encourage this community enterprise, continuing next season.

John Wells was hobnobbing around town last week on crutches as a result of a motor cycle accident. The motor cycle, driven by Tom Rutherford was side-swiped by a car which overturned the cycle and had the audacity to run over John's right foot. The foot is mending quickly, however, and he is around again, almost as good as new.

The action of the provincial government in taking steps to prevent the rich rumormongers at Great Bear Lake from getting into the control of private monopoly is commendable.

Action to check the flow of "bootleg" liquor from the United States into Alberta and other provinces may well prove to be one of the big problems of the near future, stated Premier Brownlee in the legislature Friday night.

The Alberta Legislature has voted to request the Dominion Government to make no further appointment when the present term of Lieutenant-Governor Walsh is completed, and to explore the advisability of using Government House and grounds as a tubercular sanatorium.

ORANGE PEKOE BLEND

"Fresh from the Gardens"

Go North, Young Man!

It may be that some natural law of compensation works in these things! Just at a time when Western Canada was beginning to acclimatize itself to the new viewpoint that it cannot grow wheat to its heart's content, along comes a new realization of its potentialities in another direction that fans the flame of its optimism.

The realization is, of course, that in the great pre-Cambrian areas sweeping northwest from the Ontario-Manitoba boundary lies wealth of mineral resources which, if itself, is sufficient to guarantee a great and glorious future for this western country. Development which began in the rock formations of Ontario and which later spread through the same structures in Central and Northern Manitoba, shortly will become manifest in Northern Saskatchewan. This eventually will compensate the prairie regions for the apparently false glory of their wheat fields.

Youth has suffered as result of economic depression in these western provinces due to scarcity of employment and the narrow field of opportunity open to them in a period of financial stringency and industrial stagnation. Many have been unable to secure a foothold, and have now reached adulthood without attaining that independence without which the term is barren and comfortless. They feel circumstances over which they have no control, and concerning which they had no voice, have robbed them of a tight-rope and they are looking to the political leaders for assurance their claims are not being ignored. It is occupation they seek, opportunity that takes place in the full, responsible citizenship of the country.

While agriculture will remain the great source of food and of the prairie provinces, it is obvious that, under present world conditions, opportunities for youth in the path their pioneer fathers trod are singularly limited in scope and variety. Obviously then, the salvation lies elsewhere. Opportunities must be created—and created not only for the rising generation now clamoring for its place in the sun, but created also for a future influx of new population which is essential to the attainment of a balanced economic structure upon which future prosperity depends. Immigration, at the moment, is an unpopular topic—and rightly so. Yet wider home markets must be created not only for the produce of the prairie farms, not only for consumers goods from the industrial east, but also for the products of the country prepared to absorb the surplus agricultural production. Sooner or later, then, the problem of immigration must be tackled systematically and courageously. It will be necessary, therefore, to make intensive preparation for our own youth and our new neighbors may find employment and thus be enabled to contribute their share to the country's development.

Obviously, the one alternative to agriculture upon which Saskatchewan (particularly) has depended in the past, is a parallel development of other great primary resources of which the possibilities already are known. Saskatchewan (and we speak of Saskatchewan particularly because there the problem is acute) has abundant deposits of lignite coal, commercial clays, sodium sulphate and other non-metallic minerals throughout its prairie lands. Oil and gas, which have proved so valuable to Alberta, is being avidly sought in different sections of the province. But away to the northwest lies the great pre-Cambrian shield, world's greatest storehouse of precious metals. Its resource too are being tapped by prospectors' pick and by diamond drill. Surely the rock formation from which Ontario is reaping plentiful harvest, surely the veins which have borne the great Manitoba through the difficult years, can be exploited to Saskatchewan's advantage and made to yield their just proportion to the economic life of the province!

These thoughts are inspired by a recent statement relative to the Flin Flon mines which straddles the northern Saskatchewan-Manitoba boundary. There, an investment of \$20,000,000 is producing an annual income of \$7,600,000 and maintaining a community of some 4,000 people. The major portion of the Flin Flon city really is in Saskatchewan, and it is only a matter of time when similar development must ensue in the confines of the latter province.

Reports from the Saskatchewan hinterland indicate abundance of mineral resources, and that they have not yet been brought into commercial production is nothing new in the history of mining. Even the great Flin Flon, discovered in 1915, remained undeveloped for a space of ten years thereafter, but, once the completion of its ore were unraveled, development came quickly.

While agriculture has languished, mineral production in Canada has continued to advance. In 1932, Canadian mines produced \$20,500,000 as against \$10,228,225 in 1932—and the augurs for the future are extremely favorable.

Here then lies a fuller field for the activities of forward-looking government and the energies of ambitious youth! Here lies the wealth you wait for!

Trapped Seamen Must

Use Escape Apparatus

Britain And United States Have

Abandoned Submarine Rescues

The British Admiralty has decided

henceforth not to try to raise sunken

submarines in an effort to save lives

of trapped seamen. Sir Robert

Eyes-Monell, First Lord of the

Admiralty, informed Commons.

Instead, he said, the Navy will be

instructed to use the escape

apparatus, which theoretically en-

ables the men to shoot out individu-

ally to the surface.

He said the United States Navy

has reached a similar decision.

Business Man—"Get my broken

Miss Jones."

Stenographer—"Yes, sir. Stock or

pawn?"

Making itself Popular

British Broadcasting Corporation

Rules Out Boring Programmes

Wireless is installed in more homes

in Britain than in any other Euro-

pean country. The British Broad-

casting Corporation, subject as it is

and must be to a great deal of criti-

cism, is building up day by day a

greater clientele. It shoulders a great

responsibility, and one reason for its

increasing hold upon its millions of

listeners is its policy of ruling out

objectionable features which have

brought broadcasting a bad name in

other countries.—London Daily Her-

ald.

DRIVES HIMSELF TO

WORK AT 82

And Still Plays a Little Golf

How many of us, when we are 82,

will be the equal in health and

activity of this vigorous old Scottish

engineer? In a letter he says:—

I was born on the 14th April, 1870. I am over 82

years old. I drive my Ford car 40

miles over hills and dales to a factory,

and can still play a little golf.

I have morning for tea or coffee

and am working for some years. I

believe it is keeping me in good

health and enabling me to keep on

working at the factories as an

engineer.—L. A.

Whether you are still in your "teens

or past your prime is not either too

early or too late to start on the

"little daily dose." Just a tiny

"ladies pinch" of Ketchikan or

Ketchikan will do the trick. They

ensure internal cleanliness, and

keep the blood-purifier, and

refreshed blood is sent coursing to

every fibre of the body. Rheuma-

tism, headache, indigestion, and

backache all pass you by.

World's Largest Telescope

Twenty Tons of Glass Used In

Making Large Lens

Twenty tons of molten glass, to

form the world's largest telescope

"eye," were poured into a form at

Goring, New York, recently, before

a distinguished audience of scientists

and thousands of laymen who taxed

the hospitality of the famous glass

works.

By nightfall the last ladle of bril-

liantly glowing glass was spread in

the brick form which will stand for

10 months while the composition

hardens. Ten hours were required

to transfer the liquid glass from the

crucible, where it has been heating

since February 15, to the mould

house in a brick igloo.

An excellent anticipate, the

200-inch mirror emerges from the

annealing tank flawless in some day

will enable man to gaze into un-

known depths of the great void

beyond the earth. The astronomical

vision if all steps of the experiment

are as successful as those already

made, the lens will be increased 30

times in volume.

Whole Wheat Rolls

1 1/2 cup milk

1/2 yeast cake

2 tablespoons lukewarm water

2 tablespoons Crown Brand Corn

Bran

1 1/2 teaspoon salt

1 1/2 cups whole wheat flour

1 egg

1 1/2 cups whole wheat flour

Scald milk and when lukewarm

add the yeast dissolved in the

warm water. Beat in the white

and let rise in a warm place until

doubled in bulk. Cut down the dough

and add the bran and mix with the

beaten egg, the yeast, and the salt.

Let rise again until double in bulk,

then cut down and roll out. Cut into

French Explorer Expects To Blaze New Trail Over Rockies With The Aid Of Five Tractors

The broad back of the Rocky Mountains where they roll from Redfern Lake to the head of the Stikine river in British Columbia, is due for a blazing this summer.

C. E. Bédouze, French explorer, engineer and business man, plans to do it with an expedition, equipped with five tractors.

Lithero this area, far north of rail lines or highways, has been traversed by trappers and Indians, and then only on footpaths that they men of heart and knowledge of the wild. Aeroplanes have flown over it, and the map-maker has put it on paper, but mostly the mountains have stood unbroken.

"It's a good idea," the expedition of M. Bédouze, and an adventure. It has the spirit that makes men fly over oceans of ice, to leave it all untraced and unchanged from what it was before it was known. The gesture in this case is not in bringing some new area to light, though much knowledge will undoubtedly be gained, but in the manner of the doing.

One of man's most sturdy inventions has been chosen, the tractor, designed to conquer unwilling plains. The surface of the mountain will be torn and their valleys and peaks echo to the chug of a work-a-day machine. True, they will stand as indomitable as of yore when it is finished, and perhaps before the summer has passed may have flouted the tractors, they may not, but they will be steam-rolled without claiming a toll of human victims—and therein lies the adventure.

The tractors will tread where ways can be found, and otherwise will swing across canyons, or, if possible, around them, and then, if necessary, will be towed by the expedition to Telegraph Creek, B.C., 1,500 miles, but the tractors will be the way across the Rockies. Already a contract has been made with an airway company to help pilot routes and by cables of gasoline, and men are being sent out to cut trails in the lower levels of the early route.

The size of the party is not definitely announced, but Madame Bédouze will be along. She is the big game hunter, and plans to add British Columbia specimens to those she has brought down in many parts of the world. M. Bédouze himself is primarily interested in exploration.

The five tractors will involve five drivers and two engineers to take care of them. Then there will be guides, horses, and men to drive them. For where the tractors go, horses must be used as cables are swung and the machines transported through the air. Included in the equipment will be a 400-pound tractor capable of lifting the 4,000-pound tractor. A rubber raft reinforced with logs will be used on rivers. Not only must mountains be conquered, but a way made over snow-capped peaks.

The party should amount to a caravan of men, machinery and beasts when it sets out from Edmonton early in July to pursue its way to Fort St. John, B.C., and thence to Redfern.

For M. and Mme. Bédouze the expedition will be just the latest of many in various parts of the world. It was on a trip home from the South Seas that they learned of the adventure and big-game possibilities of British Columbia; and the Sahara in Africa, and various parts of Asia, have been ploughed by their tractors. They both know British Columbia well. With a party which included 60 horses they staged a successful big game hunt into the northern province in 1923, getting as far as Redfern. In 1926 they hunted in more southern territory, that time with 37 horses to carry supplies.

Now the great broad back of a mountain range dares them and they have accepted the challenge.

A Useful Sacrifice
A resident of Redfern, B.C., was fined 10 shillings by a magistrate on a charge he used water for his gold-fish bowl during a recent water shortage. The accused admitted the charge but declared that he reduced his own bath during the period taking only two instead of the usual four so that his pet fish could have fresh water. Although he intended sympathetically to the story, the magistrate nevertheless ordered the fine paid.

Coal carts in England are being fitted with rubber tires.

Canadian Flour Exports

Four New Markets Were Opened Up Last Year

There should be considerable interest in the question of where the flour ground from Canadian wheat goes.

The official records show that it goes to a great many different places, probably more than most people imagined.

As a matter of fact last year Canadian flour was exported to no fewer than 78 countries and four of these, France, Portugal, Salvador and Alaska, represented the development of new markets for the Canadian product during 1933.

The total shipments out of the country reached the large total of 5,570,424 barrels, with a value of \$19,013,768 as compared with 5,131,781 barrels in 1932 worth \$17,182,765.

By far Canada's best customer for flour last year was Great Britain whose purchases accounted for nearly 50 per cent. of the total exports of this commodity, Britain taking 2,429,447 barrels last year, which represented a considerable advance over the amount she bought in 1932.

Among the other large buyers of Canadian flour may be mentioned the Irish Free State, Newfoundland, Jamaica, Trinidad, and Tobago, Japan, Hong Kong, Norway, China and the Philippines.

Canada's Maple Products

Adverse Weather Conditions During Past Three Years Has Lessened Production

During the four years 1927-1930 inclusive, the yield of maple products in Canada, expressed in terms of sugar, averaged 31,386,132 pounds. During this period conditions were favorable, but in the following three years, as a result of low precipitation and adverse weather conditions during the maple season, production was greatly decreased, averaging 20,567,136 pounds of sugar. The 1933 production was 18,408,200 pounds. The wholesale price of syrup in 1933 was \$12.00 per gallon and sugar 8.5 cents per pound for maple sugar in 1932. The average wholesale prices of sugar from 1927-1933 was 15.8 cents per pound and of syrup \$15.4 per gallon.—The Agricultural Situation bulletin.

Soviet Buy Nickel

Biggest Metal Deal Ever Made With British Firms

The London Sunday Express reports that the Soviet trading agency in London has bought almost 1,000,000 worth of pure nickel, the biggest metal deal ever made with British firms, consisting of more than 4,000 tons of the metal at a price between £200 and £225 a ton.

The newspaper said an additional contract had been completed whereby the Soviet will take 500 tons of nickel sulphate from British concerns.

Solicitor—"Oh, Mr. Newrich, I just came to ask for a subscription to your new book, 'The Newrich's Guide to a Wolf and a Cat for the new hospital.'"

Newrich—"A cat? Get a double dog and have it changed to me."

THERE'S YOUTHFUL CHARM ABOUT A HOUSE

Plaided infatua can be "tick-in" or overblown. But, ready as she always is with remedies for material difficulties, has designed this smart shirtwaist blouse to suit many figures. A tuck-in blouse is most flattering to youthful figures.

However, for women who are not exceedingly slim, it is apt to give a hunched-up look. The design you can have your way about it. Wear it tuck-in or overblown. The pattern provides for same. See work sketch for overblown.

Briefed necktie, silk, plain crepe silk, handkerchief pattern, cotton shawl in necktie pattern, etc., are other nice mediums.

It's simplicity itself to run it up on the sewing machine, and the sewing is enormous.

Style No. 604 is designed in sizes 14, 16, 18 years, 36, 38 and 40 inches bust. It requires 1 1/2 yards 36-inch material.

Price of pattern 20 cents in stamps or coin (not in preferred). Wrap coin carefully.

Combined Air And Ship Route Across The Atlantic To Be Put In Operation This Summer

Prospective Wheat Yield

Many Factors Apparent That May Seriously Affect Western Prospects

Several factors are apparent at the present time which may affect the prospective wheat yield this year. According to "The Agricultural Situation" bulletin, issued by the Dominion Department of Agriculture, drought over wide areas of the past five years has reduced reserve moisture, and favorable conditions will have to be experienced throughout the growing season to offset the effects of climate during the preceding seasons. Due to the emphasis being laid upon early seeding and the ploughing of stubble land before seeding for purposes of insect control some consequent reduction in acreage may be expected in the prairie provinces. Some reduction in average yield may be expected over large areas where grasshoppers and pest weevils cutworms will be present in outbreak numbers.

A new route has been chosen by the Canadian and British companies, and the first stage will be by ship from England to Red Bay in the Straits of Belle Isle, and thence by flying boat to Montreal.

The flying boats to be used for carrying the mail from ship to the mainland will be loaned to the Canadian company by the Imperial Airways.

It is estimated that the whole journey will occupy three days two hours, as against four days six hours, the best transatlantic mail crossing so far achieved.

The prospect of a direct Atlantic crossing has been momentarily shadowed by the British aviation authorities because no machine capable of achieving it has yet been constructed.

The present plan, however, is really intended to give the Imperial Airways a breathing space to plan a direct crossing when the time comes. Experiments are being carried out with sea-drones to halve the long trip necessary for a direct crossing.

The appearance of a machine which would be capable of a direct Atlantic crossing with a load of mail is considered to be not far distant, and the England-Australia air race in October is expected to reveal an improved machine. The long haul way towards flying the long way.

British air experts estimate that the machine which will win this race should be capable of a direct hop from England to Bagdad, a distance of 2,600 miles. A direct crossing of the Atlantic is only a little over 2,000 miles.

Machines of this kind are already under construction by a big British company, and their performance during the England-Australia race will be carefully checked by those who are interested in the Atlantic air route.

Princess George, R.C. Has No Bear Grease To Spare

The Canadian National Railways magazine says the Prince George, British Columbia, board of trade has notified its members that a Los Angeles man wants a regular supply of bear grease for his soap factory. It is not particular whether the grease comes from black, brown or grizzly bears, but it is a resident of Prince George. Local market will absorb all the grease. Possessors of bear grease are advised to hold their supplies for a rising market.

Something We Would Miss

Spring and Summer Would Be Queer Without Birds

Some morning, soon the chorus will be full enough to waken you. Song will outdo the sun. As it grows from day to day, you'll hear in it a promise of freedom from the furnace-heating tastes of winter, of trudging through snow and slush, a promise of green fields and leafy trees; of flowers and vegetables and fruits of the busy hum of nature and of long twilight evening. How fine to have the birds back! You'll say to yourself, "How you ever stopped to think what would happen if they didn't come back?"

Fortune In Paper Bag

A bedraggled old woman found lying on a sidewalk in St. Paul, Minn., a paper bag containing \$4,076 in bills.

The woman said the money represented her life savings as a servant and that she was afraid of

Ranchers north of town are complaining about the inconvenience for loading cattle at the C. P. R. corral here. The main complaint is that the corral is on the wrong side of the main line, which compels shippers to herd the stock into town and around buildings in order to get them to the loading corral. This not only takes considerably more time but is very hard on the wild stock. Because of this handicap many ranchers who are nearer Redcliff take their stock to Bowell and Sutherland and some prefer to go the even longer distance to Buffalo, to load.

Redcliff is the logical centre to which to come. In preference to Buffalo, not only because it is nearer but because it is on the main line which means a great saving of time. In getting to the market.

The Review took this matter up with C. P. R. officials and was very cordially received by Mr. Gilmour who is in charge of this department. While appreciating the claims of the ranchers, Mr. Gilmour explained that except in cases of great emergency it was difficult to get authorization for the building of additional spurs off the main line. Such a spur would be necessary in order to change the corral to the north side of the main line.

Mr. Gilmour, however, assured us that the matter would be looked into and that at least some improvement might be made to the present corral to make it more satisfactory.

It is expected that between fifty and sixty car loads of stock will be shipped from the north district during the coming shipping season.

Bachelors in Italy now have to hand over 50 percent of their incomes to the government as a tax. They're lucky. If they were married they'd have to hand it all over to "the wife."

Residents are busy these days getting ready for gardening and beautifying their homes. This reminds us that we haven't heard much about the Horticultural Society lately. This should be a good year to get such a movement well under way.

Dr. Ward is already busy preparing his flower garden, east of his office, for spring operations. It is his intention to make it considerably larger this year. His garden was quite a beauty spot last year and showed what can be done with the bald-headed prairie by a little care and attention.

Town foreman Kitchen and his staff have been making some big improvements in the sidewalks in town lately. New substantial walks have been put down in front of the school and to the churches and much needed repairs are being made on Broadway and Third Street.

With a few more street lights at important corners such as those near the churches, an

other big improvement would be made.

The selection of good seed is the point for the production of a crop of wheat. It is reasonably free from disease. It is from the Sask. Experimental Farm. A sample of wheat, to be satisfactory for seeding purposes, should have a germinating capacity of ninety per cent.

Governments of the prairie provinces are already arranging for the distribution of grasshopper poison.

Here and There

Princess Junbo, sister of the Emperor of Manchukuo, with her husband, T. K. Cheng, were passengers aboard the Duchess of Richmond recently. They travelled across Canada via the Canadian Pacific Railway and sailed from Vancouver to Ontario on the last Empress of Canada.

Heaviest motor traffic in years with main line trains running in extra sections and with additional coaches and parlor cars on branch line trains, Canadian Pacific Railway, was reported over the recent holiday, right across the Dominion. Special low fares attracted many passengers.

In the annual statement of the C. P. R. for last year, published recently, it was brought out that as a result of decreased earnings the great majority of railway employees have taken a cut of fifteen per cent. In wages; higher officials have been reduced 30% and the Company's directors have had a 25% cut in their fees. While E. W. Beatty, Chairman and President, has at his own request taken a reduction of forty per cent.

Eight days only after they had witnessed the Grand National classic at Aintree, near Liverpool, a number of Torontoites reached their homes in time for the Easter celebrations. The achievement was made possible by a fast voyage of the Duchess of Richmond under her new commander, Captain Arthur Rutwell.

Announcement is made by the Canadian Pacific Railway that it will now accept shipments of freight via Port McNicoll and its lake and rail route subject to delay at Port McNicoll, pending the first sailing. Three Canadian Pacific ships will be in service on the Great Lakes during the coming season.

"Brise ship of the Atlantic" as she was called by reason of the large number of prospective bridegrooms carried from Great Britain and the continent to Canada, the Metapora of the Canadian Pacific Steamships is to be sold for scrap, her owners announced recently.

Fifty years of railroad service, 35 of them with the Canadian Pacific Railway, were honored recently at the Royal York Hotel by a luncheon and presentation to Robert E. Larmour, retired general freight agent at Toronto. E. W. Beatty, K.C., M.P., chairman and President of the company; Grant Hall, vice-president; and George Hughes, traffic vice-president, were among those who attended.

L. G. Perreault, K.C., assistant solicitor, Canadian Pacific Railway, has been promoted to the post of solicitor of the company for the province of Quebec, succeeding the late Rodolphe Paradis, K.C., the appointment being effective as from April 1.

Captain David Sinclair MacQueen, commander of the Canadian Pacific liner Duchess of Athol, will retire on May 1, after 44 years spent on sea service, most of which was in the employ of the old Allan Line and Canadian Pacific Steamships.

"Brass Tacks"

A GOOD many years ago, most merchants used to "yard off" a length of cloth by estimating a yard as the distance from the tip of their nose to the extremity of an outstretched arm—or by some equally haphazard system.

No doubt some customers may have noticed that certain merchants had their arms "a good deal longer" than others, and, vaguely that something was wrong, but nobody did much about it until our bright correspondent, Mr. E. W. Beatty, M.P., M.L.A., recently followed him down to "beet roots" in their measuring. That was how the expression came.

EATON'S Catalogue "gets down to brass tacks" in describing its merchandise. There's nothing vague—nothing uncertain—nothing that can be "taken two ways." If an article is sold, we say so and it is sold. It's always, you KNOW what you're getting. Accurate illustrations and precise information tells exactly the value you'll realize for the money you'll spend. Of course, it's our aim to make that value the best you can obtain anywhere. But in any case, you KNOW what you're getting—experience has taught you long ago that "It's SAFE to see it at EATON'S."

EATON'S

Fine Subway In London

Best Way To Get Places In The Shortest Time

The best way to see London is, as Mr. Gladstone said in the days of horses, from the top of a bus. This may account for the fact that even the Londoner as well as the visitor makes 200 bus journeys a year compared with only 78 by "tube" or underground railway. It is, of course, fascinating, even to a Londoner, who likes to sail along watching the teeming life of the community. But if you want to get any place in the shortest time then the best way is to dive below.

The "tube" companies have great faith in their transport, however, and are just now completing a three years program of development costing \$50,000,000. Lines have been modernized, and some wonderful new stations have been built; places as interesting as any sight to be seen in London. You may stand in the hall, for instance, and watch an animated device which shows exactly where every train is starting, stopping or moving. Go down below and you will find beautifully clean stations, lined with a decorative tile, and of design of glazed tile which is not only bright but enables the regular traveller to identify his station even if he cannot see the name from the carriage window. There is not a porter to be seen, nor a signal cabin; every use of the human hand is controlled from a single room at St. James' Park station, near the House of Parliament. In the busy part of the day the train is in motion on each other's heels that one train is pulling out while the next is pulling in at the other end, and being less than one minute between trains. Automatic control prevents accidents. There are 130 stations on the "tube" system.

The London subway system is probably the best in the world.—St. Thomas Times-Journal.

Canada Produces Quality Bacon

Government Is Taking Every Precaution To See That Exports Are Of High Grade

The superior quality of Canadian bacon has often occasioned comment by visitors travelling in this country and by the consumers of bacon in other lands. It has contributed to the rapid increase of Canadian bacon shipments to the British market, which in 1931 amounted to only 4,300,000 pounds, and in 1932 reached a total of 56,000,000 pounds.

In order to ensure continuation of the quality which has made this rapid growth possible, the Canadian government department of agriculture has introduced regulations governing the grading, marketing and sale of bacon. Under these regulations the right to export Canadian bacon is dependent on a license issued by the minister of agriculture, and all such bacon and the regulations must be stamped with a clearly such data as may be required. Each shipment of bacon is accompanied by a statement giving the number of packages, the weight, the grades and the number of packages, supported by the signature of the proper Canadian government official. In the event of a breach of any of the regulations the license to export may be suspended or cancelled.

Five Million Canadians

Canada's Heavy Investment In Agricultural Industry

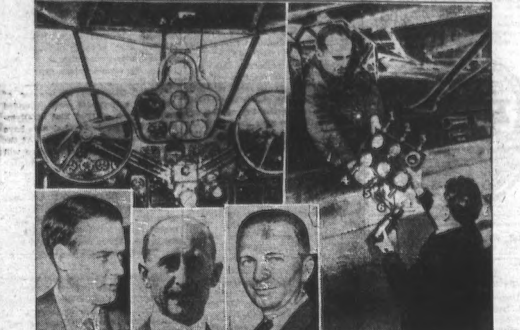

The following figures indicate the extent of Canada's investment in agriculture, an industry which, Dr. T. W. Grindley, Chief Agricultural Branch of the Bureau of Statistics, points out in "Statistics of Agriculture," reports nearly 5,000,000 of Canada's population directly and many others indirectly through farm purchasing power. Canada has an area of about 350 million acres of land suitable for farming purposes. Of this total, 24,000,000 acres are in occupied farms of which nearly 86 million are improved land. Even at the low valuations existing in June, 1932, farm land was valued at \$1,945,070,000. Buildings on farms represented a further investment of \$1,242,924,000 at 1932 valuations.

Quebec Port Busy

Over 300 years ships have been entering and leaving the Port of Quebec, on the River St. Lawrence, but 1933 was one of the busiest years in the history of the port. The number of vessels docked totaled 1,003 with a net registered tonnage of 5,628,511 tons compared with 800 vessels in 1932 of 5,348,758 tons.

SPECIAL EXPERTS TO INVESTIGATE ARMY MAIL FLYING

The above three civilians, all businessmen in the aviation world, were named by George Dern, United States Secretary of War, on the committee to investigate the army's operation of the mail. Left to right: Colonel Charles A. Lindbergh, who refused the honor; Orville Wright, pioneer of aviation, and Clarence Chamberlain. Above, an interesting comparison between the equipment of commercial transport planes (left) and the blind flying apparatus used by army planes in flying the mail (right). Note that the army plane's apparatus is held in a man's hands.

Facts About The Bible

Many People Are Not Familiar With Following Statistics

An interesting compilation of an old English Bible of the King James Version shows the following interesting facts:

The Old Testament contains 39 books, 122 chapters, 2,314 verses, 983,493 words and 2,738,100 letters.

The New Testament contains 27 books, 260 chapters, 7,669 verses, 181,333 words and 434,300 letters.

The Bible contains 66 books, 1,189 chapters, 31,173 verses, 773,746 words and 2,566,400 letters.

The middle book of the Old Testament is Proverbs. The middle chapter is Job 28. The middle verse is 2 Chronicles 20, between verses 17 and 18. The shortest book is Obadiah. The shortest verse is 1. Chron. 1:25. The word "and" occurs 35,543 times. 2 Kings 19 and Isaiah 37 are alike. The last two verses of 2 Chronicles and the opening verses of the Book of Ezra are alike.

There are nearly 30 books mentioned, but not found in the Bible, consisting of civil records and other ancient writings now nearly all lost. About 94 of them are alluded to in the Bible.

The middle book of the New Testament is 1 Thessalonians. The middle chapter is between Romans 12 and 13. The smallest chapter is 2 John. The smallest verse is John 11, 35. The word "and" occurs 10,646 times.

The number of authors of the Bible is 50. The Bible was not, until modern times, divided into chapters and verses. The number of languages on earth is estimated at 3,000; the Bible or parts of it have been translated into only 650 languages and dialects together. The first English translation complete of the Bible was by Wyclif in 1380. The first American edition was printed in Boston in 1702.

Hen Liked Wallboard

Sugar Cane Fibre Proves A Difficulty To Poultry

Richard D. Benson of South Olean, Mass., lived his hen house with wallboard to keep the chickens warm during the winter, but the hen decided that they would rather eat than be comfortable. Less than a week later there was little wallboard left because the chickens had picked it off until most of it was gone. It was explained that the sugar cane fibre, of which the board is made, proved to be such a delicious Rhode Island Reds couldn't resist it.

Would Not Stay Distributed

When the chaps who are advocating the redistribution of wealth manage to pass legislation to put it into action they will have to provide for a redistribution every ten years. Because when all this money is taken from the rich and spread around, it will only take about five years for the spendthrift to spend it all and the capitalist, named business man to get it all back in that time.

Human beings may live 40 days without food, but no more than four or five days without water.

Unlike the animals and man, trees continue to grow for most of their lives.

Historic Old Farm Divided

Land Owned By Tolmies On Vancouver Island Since 1858

Another of the historic old farms of British Columbia is to be broken up into small units for the production of vegetables, small fruits, poultry and the like. This is the well-known Broadfoot farm, just outside of the city of Victoria, owned by Dr. S. F. Tolmie and by his father, Dr. William Fraser Tolmie before him. Their ownership dates back to 1858 and has been one of the show places of Vancouver Island.

The plan follows the precedent of Delta Manor. There will be a resident farm manager, who will advise the new owners and in addition Dr. Tolmie himself, who knows every foot of the old place, will be available for any advice which he can give.

The place has been subdivided into lots of one to four acres.

When Discipline Is Removed

Some People Only Do Their Work When Driven

There is an old saying: "Ghosts must when the devil drives" and it is in this spirit that many of us go through life. We are punctual at our work and we do this or that job, merely because we are required to do so by someone in authority. We need a master to drive us, otherwise we never get anywhere. When discipline is removed, we simply drop behind in the race, because we have never learned and practiced self-discipline—probably the most important attribute to success in life.

Self-discipline is by no means merely a matter of keeping time. It is a matter of keeping up to the mark in all small details of existence, however unimportant they may seem.

Big Price For Fish

A fruit dish weighing exactly one pound was sold at auction in London recently for \$2,000. It belonged to Charles I. in 1633, and was being based on the price per ounce. It had been owned by Earl Howe, the racing autist.

Woman first tempted man to eat—and then he took to drinking on his own accord.

Millions For Medicines

Large Amount Spent Annually On Patent And Proprietary Products

The people of Canada spend a substantial amount annually on patent and proprietary medicines. A report just issued on the Medicinal and Pharmaceutical Preparations Industry for the year 1932 places the value of production for that year at \$17,678,970. The three principal lines in the total are: Varied medicinal and pharmaceutical preparations, \$5,841,773; toilet preparations, \$3,372,000; and pills, tablets and powders, \$1,824,974.

Of the 151 factories in this industry, 86 were in Ontario, 51 in Quebec, seven in Manitoba, four in British Columbia and one in each of Nova Scotia, New Brunswick and Alberta. Plants in Ontario produced 63 per cent. of the Canadian output, and concerns in Quebec accounted for 29 per cent.

Imports into Canada of drugs, medicinal and pharmaceuticals were valued at \$2,532,025 in 1932. About 44 per cent. came from United States, 21 per cent. from the United Kingdom, and 14 per cent. from France. Exports of medicinal and proprietary preparations totaled \$8,770,101 in 1932.

Search For Meteor

Eastern Scientists Would Like To Obtain Particles Of Aerial Body

Little particles of a meteorite which passed over the western hemisphere recently and sent vibrant tremors upward as it struck the heavy inner atmosphere, will be the object of a search, planned by University of Toronto scientists.

Headed by Dr. C. W. Chace, chief of the university's astronomical department, the scientist group plans to carry on special investigations to ascertain if particles of the aerial body struck the earth.

The department at University of Ontario is waiting for communications of persons who might have seen the brilliant meteor and thought to notify them of its direction as signified from stated points.

More than 1,000 workmen's houses are to be built in Belfast, Ireland.

When Things Were Different

Village Printing Office Was Considered School For Apprentice

A good many people mislead themselves by not having these investigations at just 18—every newspaper had its own village printing office of other times. Of course there were few large hand-sets used then, but that the big type of today being in style then there could have been a line heading made to say: "Youth Worker 60 Hours Per Week For \$13.00." Then the lower part of the heading and the first paragraph in the story could have read that very often part of the \$1.00 per week had to be taken out in an order on a store. It could have mentioned that in the summer time he had to cut the lawn at the boss's house and in the winter time had him to officiate with the hock-saw to keep the woodshed filled. It would have made a splendid story. Of that we are certain.

Hours were from seven in the morning until six at night, and in winter from 6:30 in the morning, before the first had to be put on and being paid at the same time. On Wednesday night the paper was printed, folded and mailed and that was the end of the day. The following morning the stage left at 8, and it was necessary to be on hand to put several bundles of papers on for expectant readers in the surrounding territory.

But the boss then used to always insist on the fact that the boy was learning a great business, and was that he was receiving was worth much to him. Some day he would strike out in the world and be a big man among other big men. He was actually receiving priceless instruction by the way he was paid at the same time. Whether similar logic would hold good to-day we do not know. But it must be admitted the second year was rather than the first, for then the weekly wage became \$2, although it is a fact that it was increased.

Here never been washed. An accumulation of 30 years' grime, congeals the windows of the old Champlain Hotel, never falling glass for many years. It is believed that some of these pools date back to the building's opening. Such was progress—Stratford Beacon-Herald.

Would Destroy Effect

Windows Of Building In Chicago Have Never Been Washed

An accumulation of 30 years' grime, congeals the windows of the old Champlain Hotel, never falling glass for many years. It is believed that some of these pools date back to the building's opening. Such was progress—Stratford Beacon-Herald.

Ever since the completion of the building thirty years ago, the windows have not been polished, because, if clean, they would "outshine" the surrounding city. The structure and destroy the desired effect. The building is a replica of the dining hall of Christ Church in Oxford, England.

The sunlight, it was explained, would conflict with the artistic result, and, therefore, everything that removed by rain, the grime has been allowed to coat year after year.

Have Had Long Journey

Two Post Cars Followed Fast For Many Months

Two post cars, after following Charles Radke of Pointe Claire, Quebec, to various parts of the world for six months, finally "got their man."

Mr. Radke recently received the cards which had been mailed to him while he was a sailor last summer in Germany. The boat he was working on had gone on a long voyage to India, Burma, and several other places in the east. The cards followed him up through his sea experiences and eventually reached him. One of the cards had been sent to him at different postmarks.

Canada's Alfalfa

Most of the alfalfa seed grown in Canada is required for domestic consumption and usually the domestic demand absorbs the crop even in years of heavy production. The average annual production over the past five years has been about 2,500,000 pounds, and the consumption approximately the same. Having regard to the great popularity of the alfalfa crop in Canada, and the possibilities of its further expansion as a forage crop, there would appear to be no immediate danger of an overproduction of the seed.

"What a very long leg!" explained the young lad when the dessert was served. "It's really too big for me."

"It can't help it," replied the bride. "I shopped all over town, and that was the shortest rubber leg I could find anywhere."

Achievements Of Youth

Biographies Show Many Men Attained Fame Before Thirty

When Lindbergh flew to France—at just 18—every newspaper had its own village printing office of other times. Of course there were few large hand-sets used then, but that the big type of today being in style then there could have been a line heading made to say: "Youth Worker 60 Hours Per Week For \$13.00." Then the lower part of the heading and the first paragraph in the story could have read that very often part of the \$1.00 per week had to be taken out in an order on a store. It could have mentioned that in the summer time he had to cut the lawn at the boss's house and in the winter time had him to officiate with the hock-saw to keep the woodshed filled. It would have made a splendid story. Of that we are certain.

Hours were from seven in the morning until six at night, and in winter from 6:30 in the morning, before the first had to be put on and being paid at the same time. On Wednesday night the paper was printed, folded and mailed and that was the end of the day. The following morning the stage left at 8, and it was necessary to be on hand to put several bundles of papers on for expectant readers in the surrounding territory.

But the boss then used to always insist on the fact that the boy was learning a great business, and was that he was receiving was worth much to him. Some day he would strike out in the world and be a big man among other big men. He was actually receiving priceless instruction by the way he was paid at the same time. Whether similar logic would hold good to-day we do not know. But it must be admitted the second year was rather than the first, for then the weekly wage became \$2, although it is a fact that it was increased.

Drinking Pools For Cattle

New Funds In England Hardly Fall

Many generations of sheep and cattle owe a debt of gratitude to the drainage of the English fens. When other sheets of water often dry up, sheep-pools, rarely fail the hot, thirsty animals grazing among the "balsam" of the draining pools.

about in Hampshire and the Sussex Downs; Berkshire and Wiltshire have good supplies of the water to be found in Bedfordshire, Hertfordshire, Lincolnshire and Yorkshire. The Lincolnshire and Yorkshire sheets are at Chaulconbury, Lincolnshire, and the water falling glass for many years. It is believed that some of these pools date back to the building's opening. Such was progress—Stratford Beacon-Herald.

Ever since the completion of the building thirty years ago, the windows have not been polished, because, if clean, they would "outshine" the surrounding city. The structure and destroy the desired effect. The building is a replica of the dining hall of Christ Church in Oxford, England.

World's Slowest Train

"Ten And Sugar" Special Carries

Support To American Tourists. The British Empire seems to hold the doubtful distinction of having the slowest train in the world, but it knows where it is going and gets there. This Australian train, the "Ten and sugar" special which carries tourists from Perth to Kalgoorlie and way points. Under its not too pressing schedule, the train takes a week to travel the 1,000 miles and another week to make the return trip. Occasionally the train carries passengers, who pay for the trip, the impatient sort.—Herald Sun.

Daughter: When you returned him my hand, did he go down on his knees?"

Dad: "I didn't notice where he lit."

Eggs, pork, milk and poultry are to be canned in a factory owned by farmers of Warwickshire, England.

WORLD HAPPENINGS BRIEFLY TOLD

The United States senate has adopted the conference report on the temporary air mail bill providing for mail transport by army planes.

Australian Pilot Mac Robertson has indicated his intention of flying a low-winged light monoplane in the London-to-Melbourne race, which begins October 30.

Maximum hours of work are cut from 56 to 48 hours a week under the new "hours of work" bill given second reading in the British Columbia legislature.

Tobacco production in Canada in 1933 totalled 39,400,000 pounds from 43,985 acres. Of this amount Ontario produced 32,040,000 pounds, Quebec 6,095,000 pounds, and British Columbia, 508,000 pounds.

Three church buildings at Port Beaulieu, B.C., located at the mouth of the Skeena river, have been destroyed by fire, according to word received by British Columbia provincial police.

The Revenue Post says the United States government is being defrauded annually of from \$2,000,000 to \$5,000,000 in postal revenues by a ring trafficking in "washed" cancelled stamps.

Mrs. Mary Mahaffy Blair, widow of Judge Blair, of Melville, died recently at the home of her daughter in Ottawa, W. M. Blair, of St. Thomas, Ont., is among the surviving children.

Nineteen British Fascist members of the organization headed by Sir Oswald Mosley, appeared in Old Bailey police court and were freed with a reprimand. They promised not to disturb the peace.

Edward Stone, general passenger agent of the Canadian Pacific railway in Hong Kong, died there recently, following a lengthy illness, according to a cable received by J. J. Foster, steamship general manager.

John G. Hutchinson, 67, owner and editor of the Cariboo Observer, is dead following a long illness. Mr. Hutchinson was born at Newmarket, Ont., and worked with the Ottawa Free Press, the Ottawa Evening Journal and the Dominion Government Printing office.

"Just why do you want a married man to work for you, rather than a bachelor?" asked the curious chap.

"Well," sighed the boss, "the married men don't get so upset if I yell at them."

CAN'T SLIP OR SLIDE FALSE TEETH

Don't use any old kind of remedy to keep false teeth in place—use a reliable, recognized one which is the only one that can be worn safely. The new "Presty Pack" is the only one that can be worn safely. The new "Presty Pack" is the only one that can be worn safely. The new "Presty Pack" is the only one that can be worn safely.

"Umbrella" Plane Tested

New Type Machine Flies 135 Miles An Hour

A new type "umbrella" airplane, which takes off with a 100-foot run and lands safely inside a 25-foot circle has been given successful tests at Curtiss-Wright airport, Chicago.

The plane has a 15-foot circular "spring" instead of standard wing plane construction, with alleron encircling almost half the circumference of the "umbrella." It is powered with a 125-horsepower motor.

In repeated tests the plane dropped to earth at a 60-degree angle at a speed slower than a parachute. It gained speed on the take-off at 700 feet a minute and reached an air-speed of 135 miles an hour.

Dwight Morrow, the test pilot, said the plane was more stable than standard types of craft and that a novice could be taught to fly it in a few hours.

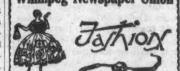

Looked Like Distress Signal

Sailors' Clothing Hung To Dry Gave Coastguards Hard Trip

Sailors must not hang their clothing on a ship's rigging to dry, so warns the coast guard at Ocean City, Maryland. Through the snow and fog recently a patrol boat saw a ship flying through the air.

Coast guardsmen launched into the heavy sea and rowed seven weary miles. Pulling up behind the "Annie M" out of Philadelphia, the patrol found the "distress" signals were some shirts and pants which had been hung up on the rigging to dry.

SMART DRESS WITH A REMOVABLE TOPPER—HIGH FRILLED NECK, SLENDER UPWARD POINTING WAISTLINE

Today's pattern is quite versatile. It may be worn quite a number of ways because it can have several different toppers. It can be worn tailored looking dress.

The original as sketched is navy blue crepe silk with blue and white crepe giving it a very spring-like air. And besides no practical change. No wonder she recommends it.

It is exceedingly simple to make it. Size 16, 18, 20, 22, 24, 26, 28, 30, 32, 34 and 36 inches bust.

Size 16 requires 3½ yards 39-inch material with 1½ yards 39-inch contrasting.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Sure Signs

of kidney troubles are pain in the back, difficult urination, and blood in urine. GIN PILLS relieve kidney trouble by gently cleansing and healing the inflamed tissues.

Little Journeys In Science

NITROGEN

(By Gordon H. Gust, M.A.)

Nitrogen is an indispensable element, because all life depends upon it. While this is true, it is also a fact that neither animals nor plants with the exception of certain families of bacteria, possess the power of taking nitrogen directly from the air, of which it comprises about four fifths by volume.

Nitrogen occurs in the air uncombined with other gases and in enormous quantity. It has been calculated that there are 20,000,000 tons of nitrogen above each square mile of the earth's surface. Since there are 640 acres in a square mile, the farmer owning this amount of land may claim to nitrogen enough to supply necessary nitrogen compounds to the whole world for fifty years at the present rate of consumption.

The great abundance of free nitrogen in the air is its chief advantage under ordinary conditions and to the farmer. But for many nitrogen compounds are more or less abundant and therefore tend to give up nitrogen to the air.

Nature cannot build a single cell without nitrogen. It is one of the essential constituents of all commercial explosives such as dynamite and trinitrotoluenes (T. N. T.) as well as of valuable fertilizers such as Chile saltpetre and ammonium sulphate, also of nitric acid, ammonia, certain useful drugs and medicines, and dyes of lovely colour. In spite of its apparent inertness and lack of color, odor, or taste, all life would sicken and die if deprived of nitrogen. Nitrogen is the basis of all plant and animal life. It is the basis of all life. It is the basis of all life. It is the basis of all life.

The Ships As Prisons

When men in Spain mention in the future that they have been on a cruise they may no longer be envious glances. Some of Spain's new prisons are floating ones. Because of the overcrowded conditions of old prisons following enforcement of the new Vagrancy Act, the government has chartered a few ships and put the superfluous prisoners in them.

Planting Lamb Sals

Plans are under way to hold a lamb sale in Medicine Hat next fall. City officials and members of the Chamber of Commerce are investigating the prospects for support and it is believed that around 10,000 lambs would be available.

The first free delivery of mail in the United States was in 1863.

Ask Mother—She Knows

Mother took this medicine before and after the babies came. It gave her more strength when she was weary and no headaches. — kept her on the job all through the Change. No wonder she recommends it.

Gardening

Protecting Plants In Early Spring

From Danger Caused By Frost It is in fluctuating temperatures of March and April which plays havoc among strawberries, fall wheat and clovers, not to mention perennial flowers, shrubs and climbers.

At noon when the sun is very strong the frost leaves the top of the soil and even the sap may start from the roots of shrubs and vines. But this is only temporary spring and at night when sun and temperature sink in unison the frost returns and the top crust of the soil is heaved, breaking off tiny roots. Or maybe the thaw at noon has resulted in pools of water in the crevices of perennial plants like Hollyhocks. These little pools freeze at night and in some so split the tap root. Still again damage may be caused by cold, drying winds. To guard against this sort of thing the gardener is advised to sprinkle a light mulch of leaves, straw manure or similar material over his plants or around the lower stems of tender shrubbery, climbers and rose bushes.

It is quite possible to produce good sized new potatoes by early July in most parts of Canada and this is the time the crop is really appreciated and worth some money. Risk a small amount just as now to see how much work you can do. To hurry things along, for two to three weeks before planting spread the seed potatoes out in the open places where they will get as much sun as possible through the window. Soon, healthy stout sprouts will appear and if planted carefully so as to avoid breaking of the crop will be through the ground in a few weeks.

In preparing a lawn already established it is most important to get the very best seed. There is a great deal of seed here just as in to be made because both products, in the commercial stage, are made up of mixed materials and absolutely depend on the proportion of the higher grade lines which go into the mixture. A good lawn grass mixture is made up of a mixture of domestic grasses. Some of these are quick growers, which come along speedily the first year and protect the later sowing, finer-stemmed, but really permanent grasses which will go to make the lawn in the years to come. It is these permanent grasses which are the most expensive, but without a large proportion of them, the mixture will not survive the satisfactory showing after the second year. Before sowing get the seed raked level. Allow a week to settle, and any seed seeds to germinate and then on a windless day sow at the rate of one pound per 200 square feet, going over the ground twice, once across and once lengthwise. Then rake lightly, one way only so as to merely cover the seed and if possible finish the job with a heavy roller or pounder. When the grass is up two inches commence mowing, using a very sharp machine so that there will be no danger of pulling out the young plants.

Sweet peas are the first flowers to go in. — A good result, then, must be planted just as soon as it is possible to get a space in the ground. Usually there are one or two in early April when it is possible to work up the soil in the warmest part of the garden and this is the time and place for these flowers. They do best in a climate where the summer nights are inclined to be cool. They must have extra water during dry weather. It is advisable of sowing in a trench and support on brush, strings or poultry netting. Dig the trench a foot deep and put in four or five inches of well rotted leaves, or manure. On top of this put three inches of fine sand and sow the seeds in this and the same deep.

A Very Good Idea

The Prince of Wales, who knows a thing or two, was asked what he thought of civilization. He said it was a good idea and he thought it was a good thing to have with this world would start it. Those who have an impression that civilization exists had better visit one of the firms on the Mount, which furnishes a basis for civilization in the future.

Plenty Of Snow

If all the snow that blanketed Port Arthur, Ontario, between Oct. 15, 1933, and Feb. 28, 1934, were packed into cubes of one foot square and piled end to end there would be a band of snow around the world and enough for another quarter lap. Meteorologists estimate the snowfall in Port Arthur during that period of 40 inches or nearly 4,000,000 tons.

Unions Workers In Scotland are demanding higher wages

Ready For Second Deluge

Modern Noah Expects Flood To Sweep World In 1938

"Capt." William Louis Greenwood, modern Noah, is ready to take off in his ark when, according to his prophecy, the second deluge sweeps the world in 1938.

"Capt." Greenwood is master of Ark 2nd, a fantastic craft grounded on the beach of Mud Flat at Olympia, Wash. He declared sinners have four years in which to repent. At the end of that period a tidal wave will sweep in from the Pacific and wipe out the world, leaving only himself and the repentant.

Seeders who predicted Ark 2nd would not even float, had to bear the scorn of "Capt." Greenwood when recent floods lifted the old bulk off the beach. Those floods he said were just a warning of greater floods to come.

Between clam digging and gathering firewood, the captain is a hospitable host and willingly shows visitors about his curious craft. It is a strange conglomeration of lath framework attached to the old bulk 2nd a tugboat and is painted with stars and other symbols.

Schooling Takes Least Money

Amount Small Compared With Other Expenses In Raising Child

It costs no more to raise six children and give them an average schooling than to raise seven completely illiterate. More is spent on clothing a child than sending it to school, twice as much is spent on nourishing it and nearly three times as much on housing it. The money devoted to its formal education can scarcely be considered a very small fraction of the total sum involved in bringing a child to the age of self support. It would no doubt seem smaller still if seen in comparison with the amount that it adds to the earning power of the child and reduces the expense of his maintenance when considering the wider mental life that an education opens up to the individual. These and other observations are contained in a report on "Expenditure for Schools as a Factor in the Cost of Raising the Canadian Child," which will be issued by the Dominion Bureau of Statistics shortly.

Recipes For This Week

(By Betty Barclay)

BAKED APPLE SUPREME

(Serves 6)

6 baking apples

2 tablespoons raisins

¼ cup orange juice

2 tablespoons sugar

Orange slices

Sugar

Water

Quick-cooking tapioca.

Corn apples, leaving cavity at stem end. Stuff cavities with raisins. Add sugar to orange juice and fill any remaining space in cavities with this. Bake cavities each with orange slice dipped in sugar. Add enough water to remaining sugar and oranges to make a thick sauce. Boil mixture in hot pan half-way. Add 2 tablespoons quick-cooking tapioca to each cup water used, putting bits of orange slices also between apples in pan. Bake until apples are tender. The orange makes a very pretty garnish for the apples and adds a delightful flavor.

Lemon slices and lemon juice may be used in place of orange, in which case more sugar will be needed.

CARROT, CELERY AND NUT ROLL

Hotter cut centre of split roll and fill with carrots, celery and nuts, ground together and moistened with lemon juice and boiled sauce. Bake in hot pan half-way. Add 2 tablespoons quick-cooking tapioca to each cup water used, putting bits of orange slices also between apples in pan. Bake until apples are tender. The orange makes a very pretty garnish for the apples and adds a delightful flavor.

Lemon slices and lemon juice may be used in place of orange, in which case more sugar will be needed.

Russia Has Ski Marathon

Six Officers Of Red Army Complete Long Race

America has its six-day bicycle races and France its annual ride around the republic, and now Russia, adapting the idea to its climate, has branched out into long-distance skiing of the same kind.

Six officers of the Red army have recently completed a 32-day ski marathon from the Urals to Moscow, covering 2,000 kilometers and resting only on four full days. In wide sections of the country they skied plain in hand after springing wolf packs.

THE S. E. GUST STORES

Every Argument

based on Careful Thought, Experience and Reason, suggests that Alberta Grain Growers should give support to a Co-operative Grower-Controlled Alberta Grain Handling Organization.

Many farmers have quantities of grain which they plan to dispose of either before or after seeding.

**Deliver it to
Alberta Pool Elevators**

Interesting Local Items

Mr. Kidd, of Drumheller, is at present doing some surveying at the local coal mine.

Miss Evelyn Cook leaves on Friday to join her mother in Edmonton.

Mrs. Wheeler, who has been confined to her bed for the past few weeks is able to be around again.

Mr. Geo. Lowens left on Friday for Toronto, having been called there owing to the sudden serious illness of his mother.

Thomas Hutchinson, a pioneer of Medicine Hat and its Mayor in 1904, died last Saturday after a long illness. He was sixty-three years old.

Messrs. A. R. Ballantyne and Sangster attended the G. I. Indoor Course on "Leadership in Scouting" held in Medicine Hat last week.

Mrs. J. Hope and Tom and John Davies left by car for Yoho, Tuesday, to be with their sister, Mrs. Blair, who is undergoing a serious operation here this week.

Miss Naomi Pow was among the graduating nurses of Medicine Hat hospital last Thursday when graduating exercises were conducted in Fifth Avenue Unit school.

Last Sunday, the body of a unidentified man was found in a river near the Lee Fort in north of Medicine Hat. The man was unrecognizable as he had been in the water some time.

If you want to be with the crowd be sure to be at the Little Theatre tomorrow evening. You may be one of the lucky ones to carry away one of the fifty free prizes, and hear a smart argument as well.

Miss Fern Rindahl, who has secured a position at Vauxhall left for there last week.

Mr. and Mrs. Pow and Mrs. who attended the graduation exercises of the Medicine Hat training school for nurses in Regina last.

Mr. and Mrs. E. G. Strobel and Mr. Raymond Strobel of Medicine Hat spent last Sunday in town, the guests of Mr. and Mrs. P. Campeau.

Mr. and Mrs. C. V. Gibson of Medicine Hat and Mr. and Mrs. S. Grant of Yellow Grass were visitors in town on Wednesday.

The Pressed Brick and Gundersen Brick plants are now going strong with good prospects for work all summer. The Gundersen plant is making preparations for operations in the near future.

Tickets for the Little Theatre entertainment here tomorrow evening are selling rapidly. See the Drug Store window and notice all the chances every tick holder has of securing a good prize. Get your ticket now and have no regrets later.

Last Friday morning a flock of 1000 sheep passed through town. They were the property of Mr. C. Gage of the Vauxhall district and were on their way to the Finn's Lake district to pasture on Dr. Allison Smith's lease.

Mr. Sid Harper, of the C.P.R. station staff, has received notice that he has been transferred to another point. W. A. Noble of Drumheller, has arrived here to take Mr. Harper's place. His family will arrive today. Sid is being transferred to Olds.

Mr. Bachman, provincial secretary of the Boy Scout Association, and Commissioner Knott of Medicine Hat, visited the Scout hall on Sunday afternoon and addressed the Group here. It is interesting to note that six of the ten Rhodes Scholars for 1934 are Scouts.

During the softball practice last Sunday, Shorty Mathany had the misfortune to break a small bone in his right ankle while he was running the bases when he stumbled, twisting his leg in such a way as to cause the break. After having the ankle X-rayed it was put in a plaster cast and poor Shorty will be out of the game for the rest of the season.

HOLEPROOF

Lastex

Gives all Three:

Horizontal Stretch—Vertical Stretch—Permanent Elasticity

THE miracle yarn
LASTEX is cleverly
knit in parallel rows—
a dainty but com-
petent shock absorber
for garter pull and
knee action strain.
Runs are banished—
hosiery lasts longer.
The Two-Way Stretch
Top gives free kneel-
ing—a new knee free-
dom. You will enjoy every hour you wear them.
Knit in Holeproof mills of a sheer, very clear multi-
twisted selected silk. Every pair tested and approved
in the world's most exacting laboratories. In fashion's
most wanted shades.

A neutral to wear with anything
INBETWEEN
A neutral beige for lighter blues
and greens
CLEAR
A dark tinge shade for navy and brown

A tinge mid shade for bright greens
and blues
DOESN'T
A true beige for early Spring and Summer
GUN METAL
A light gun metal for dark greys
and black
